MADDUKURI GANGADARA PAVAN DURGA SANTOSH

B.Tech CSE Student | Software Development Engineer

7995823055 santhoshgangadhar416@gmail.com East Godavari, Andhra Pradesh

LinkedIn GitHub Portfolio

Professional Summary

Computer Science undergraduate at IIIT Sri City with experience in full-stack development, intelligent systems, and algorithmic optimization. Skilled in REST API development, web automation, and problem-solving.

Education

Indian Institute of Information Technology Sri City **CGPA: 8.15 | Sem 2-2: 9.2**
B.Tech in Computer Science and Engineering
Intermediate: Tirumala Junior College 98.8%
SSC: 96.17%

Experience

B.Tech Research Project
Indian Institute of Information Technology Sri City *Under Dr. S. Manipriya*
Worked on computer vision research involving cricket ball detection, tracking, and trajectory analysis using Python, OpenCV, and YOLO.

Technical Skills

Languages: Python, Java, C, SQL, JavaScript
Frontend: HTML, CSS, React.js
Backend: Node.js, Express.js, REST APIs, HTTP, SSE
Databases: PostgreSQL, MySQL
AI/ML: Machine Learning, Computer Vision, OpenCV, YOLO11, NumPy, Pandas
Algorithms: Dijkstra, A*, Nearest Neighbor, 2-opt, DSA
Tools: Playwright, Git, Docker, Vercel, Vite
Core CS: OOP, OS, CN, DBMS

Projects

Click2Book – Online Ticket Reservation System
React.js, JavaScript, Node.js, Express.js, PostgreSQL, REST APIs
- Built a full-stack reservation application with trip search, seat selection, booking management, cancellations, and customer support.
- Developed REST APIs and reusable React components with logging, error handling, security, validation, and file uploads.
- Implemented PostgreSQL data persistence and led team coordination across frontend development, database integration, and testing.

SmartSlot AI – Intelligent Multi-Warehouse Management & Optimization System
React, JavaScript, React Three Fiber, Node.js, Vite, Dijkstra, A, SSE*
- Developed a 3D multi-warehouse management platform with inventory tracking, demand forecasting, and intelligent storage allocation.
- Implemented inventory CRUD, inter-warehouse transfers, ABC analysis, and demand-aware slotting.
- Integrated Dijkstra and A* pathfinding with Nearest Neighbor and 2-opt algorithms for optimized multi-stop picking routes; built role-based portals with real-time SSE synchronization.

PricePilot – Intelligent Multi-Store Price Comparison Platform
JavaScript, Node.js, Express.js, Playwright, REST APIs, HTML, CSS
- Built a unified search platform to collect and compare live product listings across e-commerce retailers.
- Implemented variant-aware product matching and final payable price calculations including fees and instant discounts.
- Developed cashback/EMI separation, offer ranking, retailer links, and regression tests for reliable product comparisons.

Achievements

- Won **1st Prize** at Utkrishta 2026 Hackathon for **SmartSlot AI (Neural Forget Track 2)**, as part of Team Unbreakable Loop.
- Secured **Mandal 1st Rank** in SSC examinations.
- Solved **150+ DSA problems** across LeetCode and GeeksforGeeks.

Additional Information

Languages Known: English, Telugu, Hindi
Hobbies: Cricket, Fitness, Exploring New Technologies
